

 **Speedglas®**

A Perfectly-Balanced Hard Hat For Welders

The new Speedglas® ProTop has an exclusive pivot mechanism that allows the welding helmet to “nest” down low onto the hard hat, in a perfectly-balanced, locked-down position.

Its unique design eliminates the neck strain caused by traditional welding hard hats, which have very high centers-of-gravity when raised. The nested helmet is also ideal for moving around obstacles and tight spaces. The helmet automatically unlocks when the welder pulls it back down into position over the face.

Plus:

- Four auto-darkening Speedglas® welding lenses to choose from.
- Aerodynamically-designed exhaust vents for helmet “breathability.”
- Optional Speedglas SideWindows™ increase peripheral vision by 100%.
- Independently tested to meet ANSI Z89.1 (head protection) and ANSI Z87.1 (eye & face protection).
