

# Gaskets- In-A-Can

## New, Incredibly Versatile Adhesive Sealants

Sprayon® RTV Silicone Sealants create durable, formed-in-place gaskets that can bond dissimilar materials for a waterproof, permanently-flexible, 100% silicone rubber seal. Seals have a temperature range of -80°F to 450°F...or up to 600°F for Hi-Temp Red. Sprayon RTV seals will not shrink, crack, crumble or dry out.

The handy, reusable, auto-dispensing can reaches tight spaces with ease. Sprayon RTV Sealants can be applied and cured at temperatures from -80°F to 140°F.

### Bonds & Seals:

- Dissimilar Materials, including Plastics to Metals
- Cement & Masonry
- Industrial Fabrics
- Appliance & Vehicle Trim

Call 800-925-3434 for the name of your local Sprayon industrial distributor.
